

Research Translation and Outreach: Communication and Coordination

William Suk, Ph.D., MPH
Director, NIEHS SBRP

SBRP Annual Meeting
January 12, 2006

Research Translation and Outreach

Key Functions:

- Communication and coordination

Similar goals – different audiences!!!

Community Outreach

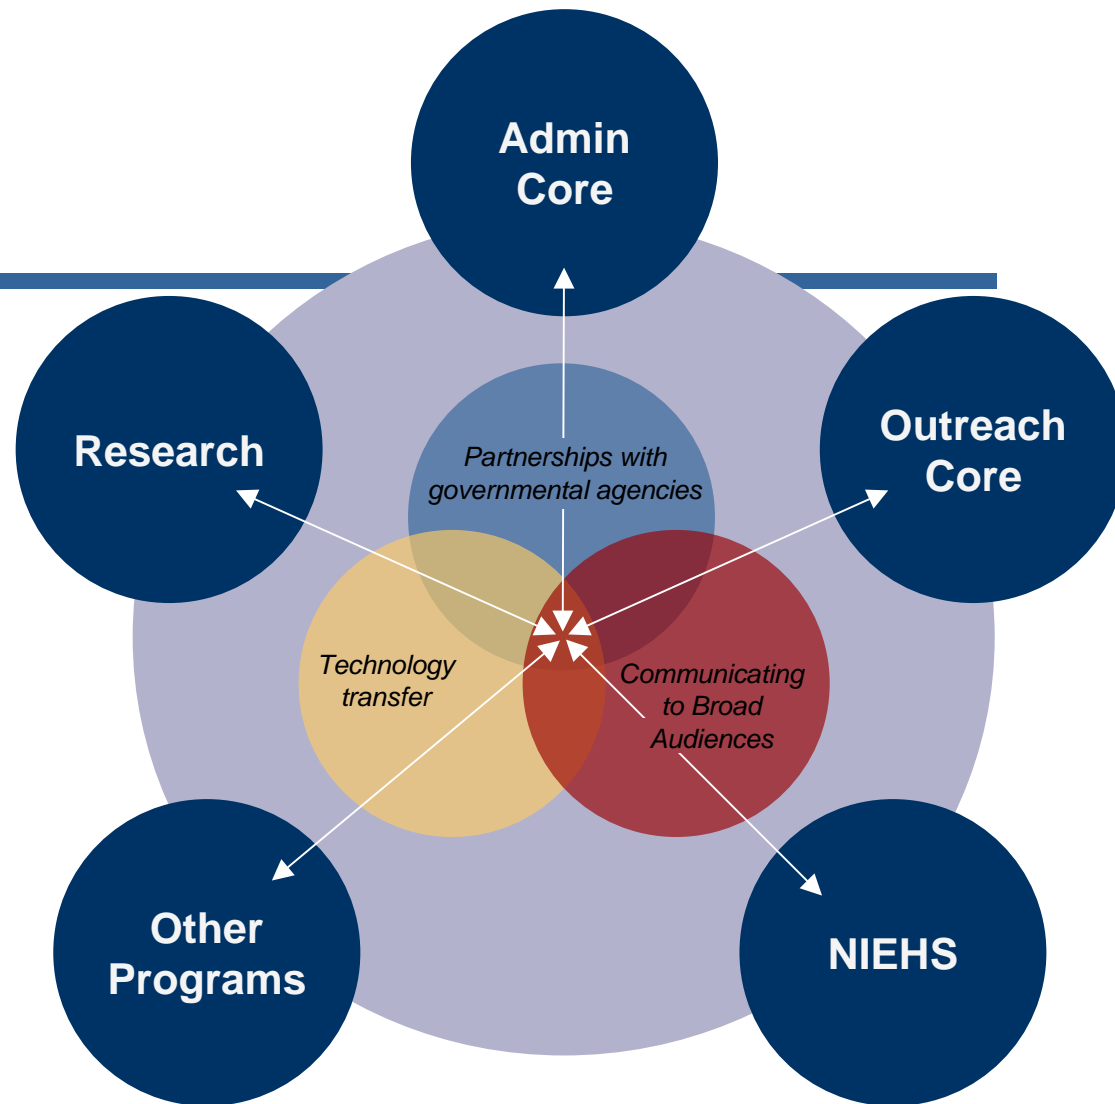

Appropriate target communities include those that, (per the RFA):

- (1) are living in proximity to, or affected by hazardous waste sites or
- (2) are exposed to hazardous substances via other pathways

Research Translation

Goal:

Move research findings/technology into the decision making process through communication

Research Translation

Examples of information to communicate to NIEHS

- Press releases
- Investigator awards
- Investigator service on panels and committees
- News for the e-Posted Notes
- Pending publications in high impact journals
- Patents, patent applications and licensing agreements
- Work with EPA to validate analytical methods or remediation technologies

[Advance notice appreciated!!!]

Research Translation and Outreach

- Communication and coordination are key
- Limitless opportunities
- Increasing need to make SBRP-funded science accessible for application
